The East German Government was requested by Poland to give advice in the construction of a fully automatic teleprinter network in Poland. The Poles asked that Engineer Beyer (fnu), chief of the Telegraphy Department at the Central Laboratory for Telecommunication Techniques at Berlin-Treptow, be sent to Poland to assist in the realization of the project. Originally Beyer was to travel to Poland in October; however, his departure was delayed because the Polish data on the planned teleprinter network did not arrive. Engineer Beyer drew up a list of questions the answers to which were to form the basis for his suggestions on the set-up of the Polish teleprinter network.
